Describe the scene depicted in the image, focusing on the visibility of lane lines, presence of vehicles or obstacles, weather conditions, and any other relevant details. Don't give any scores.

The image depicts a city scene during dusk. Several vehicles are moving on the road. The lane lines are not visible due to natural illumination conditions.

Rating blurred image during daytime: [Score 0-10] – Rate the overall image clarity/sharpness on a scale of 0-10, where 10 is extremely blurry/out of focus and 0 is tack sharp, with no visible blur.

The blurred image during daytime score is 3, indicating moderate blur.

Rating blurred image during night time: [Score 0-10] – Rate the overall image clarity/sharpness during nighttime conditions on a scale of 0-10.

The blurred image during nighttime score is 0, indicating that the image is not blurry at night.

Rating blurred lane lines due to Street Lights at Night: [Score 0-10] – Rate the clarity of lane lines affected by street lights at night.

The blurred lane lines due to street lights score is 0, indicating that streetlights are not present to blur lane lines.

Rating Lane Lines Invisibility due to Illumination (darkness or shadows): [Score 0-10] – Rate the invisibility of lane lines due to poor lighting conditions.
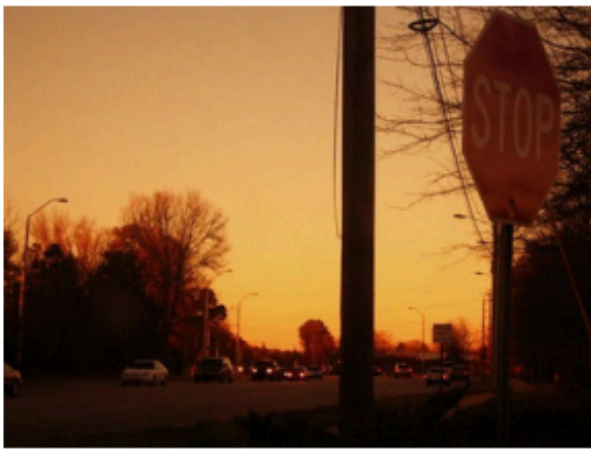

The lane lines invisibility score is 7, indicating the lane lines are somewhat obscured by poor illumination (natural dusk lighting).

Rating Lane Lines Invisibility in the image due to Fog: [Score 0-10] – Rate if fog is obscuring the lane lines.

The lane lines invisibility due to fog score is 0, indicating no fog interference.

Rating Lane Lines Invisibility in the image due to Rain: [Score 0-10] – Rate if rain is obscuring the lane lines.

The lane lines invisibility due to rain score is 0, indicating no rain interference.

Rating Lane Lines Invisibility in the image due to Snow: [Score 0-10] – Rate if snow is obscuring the lane lines.

The lane lines invisibility due to snow score is 0, indicating no snow interference.

Rating Lane Lines Invisibility in the image due to Sandstorm: [Score 0-10] – Rate if sandstorm is obscuring the lane lines.

The lane lines invisibility due to sand score is 2, indicating minimal interference due to sand or dust.

Rating Degradation of Lane Lines: [Score 0-10] – Rate the degradation or wear of the lane lines in the image.

The degradation of lane lines score is 0, indicating the lane lines are not visibly degraded (just not visible due to illumination).

Rating Vehicles or Other Objects Covering Lane Lines: [Score 0-10] – Rate if lane lines are covered by vehicles or objects.

The vehicles or other objects covering lane lines score is 2, indicating no obstructions covering the lane lines.

Rating visibility of Lane Lines: [Score 0-10] – Rate the overall invisibility of the lane markings.

The visibility of lane lines score is 0, indicating that lane lines are completely invisible.

Confidence Score = 0
